Associate Professor and Head
Department of Botany
City College, Kolkata-9

SIGNIFICANCE OF PLANTS

DEBANSU KAR, DEBANSU KAR, RISHI DAS, MUKTI SINGH
SEMESTER 2
DEPARTMENT OF BOTANY
JYU COLLEGE, KOLKATA

Plants

Plants are essential for the survival of all life on Earth. They provide oxygen, food, and shelter. They also play a role in the water cycle and the carbon cycle.

Plants and Nutrition

Plants are a rich source of vitamins and minerals. Fruits and vegetables are particularly high in these nutrients, which are essential for maintaining good health and preventing disease.

Plants and Medicine

Plants have been used in traditional medicine for centuries. Many plants have medicinal properties that can be used to treat various ailments. Examples include turmeric, ginger, and neem.

Plants and the Environment

Plants play a crucial role in the environment. They absorb carbon dioxide and release oxygen. They also help to prevent soil erosion and provide habitat for many animals.

Plants and the Economy

Plants are a major part of the economy. They provide food, raw materials for industry, and a source of income for many people.
