Notice

27/04/2023

A Students' Seminar on the topic "Modern Aspects in Nanomaterials Research" will be arranged on Tuesday, 2nd May, 2023 in Physics Department 11am onwards. All departmental teachers are earnestly requested to attend the seminar. All Physics (Hons) students are invited to attend the seminar. Teachers are requested to record attendance of respective classes.

Departmental Students' Seminar

Date: 02.05.2023

Topic: Modern aspects in nanomaterials research

Speakers: Semester 6 Honours Students of the Department

Objective and Report on the Seminar

The seminar was organized as a part of the tutorial for DSE subject. The purpose was to encourage the students to explore new and interesting topics related to nanomaterials – which is one of the frontier areas of scientific research in the present times. This will give the students a flavour of carrying out project work, enhance their ability to study a topic independently and also improve their skills at presenting their work and communicating with the audience.

Fifteen semester 6 students presented their projects. The audience consisted of students and faculty members of the department. Each presentation was followed by a brief session of question and answer where both teachers and students asked the speakers various questions. The teachers also assessed the students on the basis of their presentation.
