DR. KRISHNENDU DAS | krisshendudascc@gmail.com | 9674769528

Pharmacovigilance in Clinical Research

- Pharmacovigilance is the science and activities relating to the detection, assessment, understanding and prevention of adverse effects or any other medicine/vaccine related problem.
- All medicines and vaccines undergo rigorous testing for safety and efficacy through clinical trials before they are authorized for use.
- The clinical trial process involves studying these products in a relatively small number of selected individuals for a short period of time.
- Certain side effects may only emerge once these products have been used by a heterogeneous population, including people with other concurrent diseases, and over a long period of time.
